

ABSTRACT OF THE DISCLOSURE

The present invention relates to a method and apparatus of a brush, particularly in conjunction with cleaning and/or polishing tire rims. The brush may be adapted so as to work in tandem with a power tool, or in alternate embodiments the brush may include a handle, which enables a user to manually rotate the brush about a tire rim. The brush is provided with oversized dimensions in order to expedite the cleaning process of large tires, specifically tires used on trucks.
